Injection Molded
Polycarbonate
HOUSINGS
Steel Mounting
PEDESTALS

Proudly made in the USA

Injection Molded Polycarbonate **H O U S I N G S**

- Designed for mounting readers, intercom stations, cameras, phone entry systems & more!
- Housings are three inches deep – ideal for containment of control boards, wireless transceivers, radio receivers, etc.
- Polycarbonate material will not impede performance of RFID/proximity devices
- Integrated hinge design significantly increases unit integrity
- Detachable cover makes for incredibly easy installations
- Incredibly durable – tensile strength 9,000 PSI (method = ASTM D 638)
- Unlike metal housings, ours do not rust, dent or require painting
- Housing and cover are injection molded polycarbonate 103 – UV stabilized
- Standard lock set included and installed
- Installer friendly – use standard hand tools for mounting and customizing
- Three configurations available for any application (7"x7", 7"x13", 14"x14")
- Mechanical layout drawings available on our website www.thehousingcompany.com

PCH 049 7" x 7"

PCH 091 7" x 13"

PCH 196 14" x 14"

CUSTOMERS

David Williams, ITR of Georgia

I have been extremely satisfied with our relationship with The Housing Company. The customer service is very responsive and the products exceed our expectations. The three sizes of durable housings fit 99% of our applications with a nice custom look. We have been very pleased with the powder coated card reader pedestals that compliment the housings and match the color of our gate manufacturer's equipment.

SAY IT BEST

Ken Swaringen, AFL Telecommunications

These Housings that you guys sell are the best thing since sliced bread! Every customer that we install these for love the appearance of the Housings and Pedestals and we love the fact that they are durable and maintenance free.

**David Santa Ana,
Georgia Institute of Technology**

As Director of Parking and Transportation for Georgia State University in Atlanta, we had The Housing Company products installed at all of our parking decks and surface lots. We appreciated the consistent appearance and durability of the Housings and the fact that they never required any maintenance. Additionally, we were using proximity reader technology, and the Housings accentuated the read range of those prox readers. In my current role as Interim Director of Parking & Transportation at Georgia Tech, we have had the same Housings and Pedestals installed on the Georgia Tech campus by ITR of Georgia and have experienced the same great results!
